Executive Profile

Full-stack **AI Systems Architect** and automation specialist who leverages AI pipelines, prompt guarding, and local LLMs (Ollama/Deepseek) to build secure enterprise applications. Expertise in backend API engineering, database SSH tunneling, and warehouse operations data processing. Deployed production integrations that automated over **150 hours of manual efforts per month** (saving 0.86 FTE) and optimized operational costing, daily fulfillment center reconciliations, and logistics leakages.

Technical Core Competencies

AI & Agentic Orchestration: Local LLM setups (Ollama, Deepseek), RAG pipelines, Prompt Shielding, Vector Databases, Agent Workspaces
Backend & Web Engineering: Python (FastAPI, Streamlit, Pandas), SQL (MySQL, SQLite, DuckDB), REST APIs, SFTP integration
Secure Infrastructures: SSH database tunneling, JWT Authentication, AES-256 (Fernet) Encryption, Docker sandboxing
Frontend & UI/UX: React, TypeScript, Tailwind CSS, shadcn/ui, Three.js, React Three Fiber, WebGL
Systems & Processes: BRD/PRD writing, SDLC mapping, JIRA tracking, Git/GitHub, LaTeX, Agile sprints

Professional Experience

Holisol Logistics Pvt Ltd

New Delhi, India

AI Automation & Systems Developer

Nov 2021 – Present

- **HWMS Live Connector:** Engineered a live data connector utilizing secure SSH tunneling to interface FastAPI (Python) endpoints with internal warehouse MySQL databases. Built a 4-role RBAC access matrix and AES-256 credentials vault, eliminating manual data queries (saves 44 hours/month). Repo link: github.com/its-aman4u/hwms-insights-connector
- **Fulfillment Operations & Reconciliations:** Automated daily inventory reconciliations between WMS and ERP systems (such as Increff) using Python, SFTP, and pandas. Plugged data leakages and reduced discrepancies across regional fulfillment hubs (saves 30 hours/month).
- **MIS and Daily P&L Processing:** Developed roll-forward analytical models in Python to automate regional MIS P&L compilation. Enabled real-time profit auditing and optimized last-mile delivery rate structures (saves 25 hours/month).
- **Safety Compliance & Audit Checklists:** Digitized the corporate Permit-to-Work (PTW) checklists. Created Google Apps Script pipelines that automatically compile compliance audits and dispatch warning triggers to hub managers (saves 22.5 hours/month).
- **Documentation & Agile Practices:** Authored detailed Business Requirement Documents (BRDs) and Product Requirement Documents (PRDs) for internal automation tooling, mapping SDLC phases and tracking releases using JIRA in collaboration with cross-functional logistics teams.

Somany Ceramics Ltd

Noida, India

Data Analyst & L&D Coordinator

Mar 2024 – June 2024

- **Productivity Audits:** Designed SQL query templates and Excel spreadsheets to evaluate ground personnel training compliance; restructured the document registry to improve file retrieval speed by 30%.
- **Operational Performance Tracking:** Developed data visualization sheets and performance dashboards for the learning and development team, ensuring data accuracy and compliance with internal safety guidelines.

Holisol Logistics Pvt Ltd (Early Tenure)

New Delhi, India

Compliance & Safety Team Lead

Nov 2021 – Feb 2024

- **Process Optimization:** Led compliance audits for PAN India warehouse centers; implemented safety frameworks to reduce violation incidents by 25%.
- **Standard Operating Procedures:** Maintained SOP documentation and audited regulatory certifications for large-scale operations hubs, ensuring alignment with national safety codes.

Flagship AI & Full-Stack Projects

Zero-Trust AI Workspace Framework

Research & Systems Design

Lead Researcher — Tech: Docker sandboxing, Model Context Protocol (MCP) Security, DevSecOps

2026

- Authored a 37,000-word research publication defining execution parameters, prompt shielding, and pre-ingestion quarantine zones to isolate autonomous AI development agents inside Docker environments. Link: github.com/its-aman4u/zero-trust-ai-workspace

InsightForge Engine

Open Source Analytics Tool

Creator — Tech: Python, Streamlit, DuckDB, Pandas, local Ollama LLM

2025

- Built an ETL dashboard engine converting database logs into clean metrics; integrated local LLM queries with custom SQL validation rules ('assert_readonly()') verified by 22 automated safety tests. Link: github.com/its-aman4u/insightforge-engine

Vercel Interactive Deployments

Lead UI Developer — Tech: React, TypeScript, Tailwind CSS, Supabase, Vercel CI/CD

Rapid UI/UX Prototypes
2025

- Shipped and maintained 5 live-deployed web portals: Cyber Creative Agency (cyber-creative-agency.vercel.app), AI Exam Prep (ai-exam-prep-portal.vercel.app), Recovery Clinic (recovery-clinic-portal.vercel.app), Citizen News (citizen-news-platform.vercel.app), and Digital Quest (digital-genesis-quest.vercel.app).

Education & Credentials

ITM University

Master of Business Administration (MBA) – SCM & Logistics

Gwalior, India
2020 – 2022

University of Delhi

Bachelor of Science (B.Sc.)

Delhi, India
2015 – 2018

Certifications & Affiliations

Certified Operations Analyst — SCM Analytics Training, Holisol (2023)
Advanced Full-Stack Engineering — Open Source Software Contributions (2024)
Securing AI Workspaces — Prompt Shielding & LLM Defenses Framework (2025)
